ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: G-PROTEIN COUPLED RECEPTORS

(57) Abstract: The invention provides human G-protein coupled receptors (GCREC) and polynucleotides which identify and en-
code GCREC. The invention also provides expression vectors, host cells, antibodies, agonists, and antagonists. The invention also
provides methods for diagnosing, treating, or preventing disorders associated with aberrant expression of GCREC.

☐ Further documents are listed in the continuation of box C.☐ Patent family members are listed in annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US 01/10436

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
Although claims 18, 32, 34 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.
2. ☒ Claims Nos.: **19,20,23,24**
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
1-44 (partially), 45, 51 (complete)

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International Application No. PCT/US 01/10436

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-44 (partially) and 45 and 51 (complete)

A G-protein coupled receptor of SEQ ID NO:1 encoded by the polynucleotide of SEQ ID NO:7, host cells, transgenic organisms, method for recombinant expression, a method for detecting the GPCR of the invention, methods for treatment of a disease associated with decreased expression of the GPCR; method for screening of compounds that bind to the GPCR; method for screening of compounds that modulates the activity of the GPCR; method for screening for a compound that alters the expression of a target nucleotide; a method for assessing toxicity of a compound that result in an altered expression of the GPCR; diagnostic tests and antibodies.

2. Claims: 1-44 (partially) and 46 and 52 (complete)

As invention 1, but referred to the GPCR of SEQ ID NO:2 encoded by the polynucleotide of SEQ ID NO:8.

3. Claims: 1-44 (partially) and 47 and 53 (complete)

As invention 1, but referred to the GPCR of SEQ ID NO:3 encoded by the polynucleotide of SEQ ID NO:9.

4. Claims: 1-44 (partially) and 48 and 54 (complete)

As invention 1, but referred to the GPCR of SEQ ID NO:4 encoded by the polynucleotide of SEQ ID NO:10.

5. Claims: 1-44 (partially) and 49 and 55 (complete)

As invention 1, but referred to the GPCR of SEQ ID NO:5 encoded by the polynucleotide of SEQ ID NO:11.

6. Claims: 1-44 (partially) and 50 and 56 (complete)

As invention 1, but referred to the GPCR of SEQ ID NO:6 encoded by the polynucleotide of SEQ ID NO:12.

INTERNATIONAL SEARCH REPORT

International Application No. PCT/US 01/10436

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 19,20,23,24

Present claims 20, 21, 23 and 24 relate to a compositions and to their use in a method of treatment, wherein said compositions are defined by reference to a desirable characteristic or property, namely, that they have been identified by the screening method of claim 19 (for claims 20 and 21) and of claim 22 (for claims 23 and 24). The claims cover all compositions having this characteristic or property, whereas the application does not provides support within the meaning of Article 6 PCT neither disclosure within the meaning of Article 5 PCT for any of such compositions. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Independent of the above reasoning, the claims also lack clarity (Article 6 PCT). An attempt is made to define the composiotios by reference to a result to be achieved. Again, this lack of clarity in the present case is such as to render a meaningful search over the whole of the claimed scope impossible. Consequently, the search has not been carried out for those claims.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
